

The diagram shows a long, narrow building with a total length of 52,000 mm. The plan is divided into several sections with specific dimensions and structural features:

- Left Section:** A long section with a total length of 30,000 mm. It contains a central corridor (3,000 mm wide) and side rooms (2,000 mm wide). The rooms are divided into 12 equal parts, each 2,500 mm long. The corridor is 1,000 mm wide.
- Right Section:** A section with a total length of 22,000 mm. It contains a central corridor (3,000 mm wide) and side rooms (2,000 mm wide). The rooms are divided into 12 equal parts, each 2,500 mm long. The corridor is 1,000 mm wide.
- Central Section:** A section with a total length of 12,000 mm. It contains a central corridor (3,000 mm wide) and side rooms (2,000 mm wide). The rooms are divided into 12 equal parts, each 2,500 mm long. The corridor is 1,000 mm wide.
- Structural Details:** The plan shows a grid of structural elements. A central corridor (3,000 mm wide) runs the length of the building. Side rooms (2,000 mm wide) are located on both sides of the corridor. The rooms are divided into 12 equal parts, each 2,500 mm long. The corridor is 1,000 mm wide.
- Dimensions:** The overall length is 52,000 mm. The width of the building is 3,000 mm. The width of the corridor is 1,000 mm. The width of the side rooms is 2,000 mm.
- Notes:**
 - ინტერსის განმარტება 52 გმ/მ (Interests interpretation 52 gmm/m)
 - ინტერსის განმარტება 12+2=14 გმ/მ (Interests interpretation 12+2=14 gmm/m)
