

The diagram shows a rectangular specimen with a width of 100 and a length of 600. The specimen is divided into three regions: a central region with a complex, irregular pattern, and two side regions with a regular grid pattern. Arrows indicate the direction of the applied load.

Technical drawing of a rectangular stone block. The block is shown in perspective, with a cross-section indicated by diagonal hatching. The dimensions are as follows:

- Height: 150 (indicated by a vertical dimension line on the left).
- Width: 100 (indicated by a horizontal dimension line at the bottom).
- Depth: 50 (indicated by a vertical dimension line on the right, representing the thickness of the block).

The block is filled with a pattern of irregular, rounded shapes, representing a stone or brickwork texture.
