BILL OF QUANTITIES

ROAD: KUTAISI BYPASS-SAMTREDIA

LOT 4. SECTION KM30+000-KM41+354

Item No	Description	Unit	Quantity
1	2	3	4
BILL No	o. 1. PREPARATORY WORKS		
1	Basic survey and detailed setting out of road and right-of-way		
1.1	Basic survey and detailed setting out of road and right-of-way on main road	km	11.354
1.2	Basic survey and detailed setting out of road and right-of-way on junctions	km	0.147
2	Removal of existing concrete pavement	m ²	4,869.00
3	Dismantling of existing guardrails	l.m	11,267.00
4	Disposal existing guardrails to the production base as scrap metal	t	278.24
5	Dismantling of existing road signs and structures and disposal to the production base as scrap metal	t	40.775
6	Cutting of anchors in cast in situ concrete foundations of three-post structure and full-frame structure up to design elevation, loading manually and disposal to the production base as scrap metal	t	1.470
7	Dismantling of cast in situ concrete foundation of existing road signs	m ³	54.00
TOTAL	FOR BILL No. 1.		
BILL No). 2. EARTHWORKS		
	Main road		
1	Removal of top soil, loading and transportation for re-use	m ³	12,010.00
2	Excavation of filled soil by excavator, loading and transportation to dumpsite	m ³	23,440.00
3	Excavation of soft material to any depth in cut, load and transport to dumpsite	m ³	31,550.00
4	Construction of benches on fill slopes	m ³	33,160.00
5	Provide, place and compact fill to embankment with gravel, (borrow to fill).	m ³	430,990.00
6	Provide, place and compact fill to embankment with rock soil, (borrow to fill).	m ³	23,700.00
7	Reshaping of road bed	m²	176,790.00
8	Reshaping of slopes	m²	87,570.00
9	Distribution of top soil on fill slope thickness 15 cm	m ³	12,630.00
	Ramps and Intersections		
10	Excavation of soft material to any depth in cut, load and transport to dumpsite	m ³	950.00
11	Reshaping of road bed	m ²	2,270.00
	Dividing strip		
12	Provide, place and compact fill to dividing strip with gravel, (borrow to fill).	m ³	14,725.00
13	Provide and place fill to dividing strip with clay, (borrow to fill).	m ³	21,156.00
14	Distribution of top soil on dividing strip thickness 15 cm	m ³	5,029.00
TOTAL	FOR BILL No. 2.		•
BILL No). 3. CULVERTS AND DRENAGE		
	I. BOX CULVERTS SIZE 1.5X2.0		1

1	2	3	4
	Preparatory works		
1	Removal of existing socle in the outlet manually by jack hammers, loading and disposal to dumpsite	m ³	1.50
	Earthworks		
2	Excavations in soft soil for construction of new culverts, including loosening and breaking up material during excavation and disposal		
2.1	By excavator	m ³	630.00
2.2	Manually	m ³	31.00
3	Construction of gravel bed under the culvert, key and inlet and outlet structures	m ³	58.5
4	Filling of rubble stone around the culvert, wedging and compaction	m ³	1,680.0
5	Excavation of water course in outlet of box culverts	m ³	500.0
	New box culverts		
6	Construction of reinforced concrete box culvert, size 1.5 x 2.0 m B30F200W6 including all ancillary works and materials.	l.m	60.0
7	Construction of concrete bed under the box culvert B22.5F200W6	m ³	56.5
	Inlet/ Outlet structures		
8	Construct reinforced concrete inlet/outlet structure for box culvert 1.5X2.0m B30F200W6 as shown on the drawings including all ancillary works and materials.	m ³	27.5
9	Construction of concrete bed under the inlet/outlet structures B22.5F200W6	m ³	14.5
10	Waterproofing for inlet/outlet structures	m ²	75.0
11	Concrete of key, and socle B30F200W6	m ³	7.0
12	Stone rip-rap	m ³	50.0
	SUM I.		
	II. BOX CULVERTS SIZE 4.0X2.5		
	Preparatory works		
1	Installation of steel re-usable pipe d=1.22 m, L=12 m by crane, for removal of water, follow- up removal and transportation to the production base	l.m	48.0
2	Removal of existing socle in the outlet manually by jack hammers, loading and disposal to dumpsite	m ³	2.2
	Earthworks		
3	Excavations in soft soil for construction of new culverts, including loosening and breaking up material during excavation and disposal		
3.1	By excavator	m ³	3,550.0
3.2	Manually	m ³	177.0
4	Pumping of water with two pumps, capacity 60 m3/hr	Equip. shift	40.0
5	Construction of gravel bed under the culvert, key, and inlet and outlet structures	m ³	260.4
6	Filling of rubble stone around the culvert, wedging and compaction	m ³	7,360.0
7	Excavation of water course in outlet of box culverts	m ³	790.0
	New box culverts		
8	Construction of reinforced concrete box culvert, size 4.0x2.5 m B30F200W6 including all ancillary works and materials.	l.m	138.0
9	Construction of concrete bed under the box culvert B22.5F200W6	m ³	283.5
	Inlet/ Outlet structures		
10	Construct reinforced concrete inlet/outlet structure for box culvert 4.0x2.5m B30F200W6 as shown on the drawings including all ancillary works and materials.	m ³	276.0
11	Construction of concrete bed under the inlet/outlet structures B22.5F200W6	m ³	96.0
12	Waterproofing for inlet/outlet structures and water intake well	m ²	180.0

1	2	3	4
13	Concrete of key, and socle B30F200W6	m ³	97.8
14	Stone rip-rap	m ³	540.0
	SUM II.		
	III. BOX CULVERTS SIZE 6.0x4.5		
	Preparatory works		
1	Installation of steel re-usable pipe d=1.22 m, L=12 m by crane, for removal of water, follow- up removal and transportation to the production base	l.m	36.0
2	Removal of existing socle in the outlet manually by jack hammers, loading and disposal to dumpsite	m ³	3.6
	Earthworks		
3	Excavations in soft soil for construction of new culverts, including loosening and breaking up material during excavation and disposal		
3.1	By excavator	m ³	1,320.0
3.2	Manually	m ³	66.0
4	Pumping of water with two pumps, capacity 60 m3/hr	Equip. shift	60.0
5	Construction of gravel bed under the culvert, key and inlet and outlet structures	m ³	85.5
6	Filling of rubble stone around the culvert, wedging and compaction	m ³	6,000.0
	New box culverts		
7	Construction of reinforced concrete box culvert, size 6.0x4.5 m B30F200W6 including all ancillary works and materials.	l.m	24.0
8	Construction of concrete bed under the box culvert B22.5F200W6	m ³	64.5
	Inlet/ Outlet structures		
9	Construct reinforced concrete inlet/outlet structure for box culvert 6.0x4.5m B30F200W6 as shown on the drawings including all ancillary works and materials.	m ³	288.4
10	Construction of concrete bed under the inlet/outlet structures B22.5F200W6	m ³	69.9
11	Waterproofing for inlet/outlet structures	m ²	120.0
12	Concrete of key, and socle B30F200W6	m ³	52.2
13	Stone rip-rap	m ³	225.0
	SUM III.		
	III. BOX CULVERTS SIZE 1.0x1.5		
	Preparatory works		
1	PK 379+00 filling of concrete B22.5 F200W6 into the existing reinforced concrete pipe- culvert d=2x1.0m (Filling of concrete into culvert body L=30 m under pressure)	m ³	60.0
2	Removal of existing gabion mattresses manually, loading and disposal to dumpsite (PK 378+75.36 abutment N2 river Cherekha, on the abutment cones	m ³	3.0
	Earthworks		
3	Excavations in soft soil for construction of new culverts, including loosening and breaking up material during excavation and disposal		
3.1	By excavator	m ³	180.0
3.2	Manually	m ³	9.(
4	Pumping of water with two pumps, capacity 60 m3/hr	Equip. shift	
5	Construction of gravel bed under the culvert, key, water intake well and inlet and outlet structures	m ³	12.4
6	Filling of rubble stone around the culvert, wedging and compaction	m ³	270.0
7	Restoration of gabion mattress on cone size. 2.0x0.3x3.0 m	m ³	3.0
	New box culverts		
8	Construction of reinforced concrete box culvert, size 1.0x1.5 m B30F200W6 including all ancillary works and materials.	l.m	18.0

1	2	3	4
9	Construction of concrete bed under the box culvert B22.5F200W6	m ³	5.00
	Inlet/ Outlet structures		
10	Construct reinforced concrete inlet/outlet structure for box culvert 1.0x1.5m B30F200W6 as shown on the drawings including all ancillary works and materials.	m ³	3.70
11	Construction of concrete bed under the inlet/outlet structures B22.5F200W6	m ³	1.70
12	Concrete of water intake well, B22.5F200W6	m ³	5.60
13	Waterproofing for water intake well and inlet/outlet structures	m ²	14.00
14	Concrete of key, and socle B30F200W6	m ³	1.90
15	Stone rip-rap	m ³	9.00
	SUM III.		
	V DRENAGE		
	Treatment facilities		
1	Removal of existing treatment facilities		
1.1	Excavation of soil manually, leveling in situ	m ³	1.00
1.2	Removal of reinforced concrete by jack hammers	m ³	2.00
1.3	Dismantling of steel pipes, follow-up installation on treatment facilitates	t	0.074
2	Installation of steel pipes on treatment facilities	t	0.055
3	Excavation of soil with excavator	m ³	315.00
4	Construction of crushed aggregates bed h-10 cm	m ³	18.00
5	Construction of concrete leveling layer B20F200W6, h-10 cm	m ³	18.00
6	Construction of cast in situ reinforced concrete treatment reservoir, B30F200W6	m ³	126.00
7	Bituminous insulation	m ²	774.00
8	Backfilling of soil in pit with excavator	m ³	90.00
9	Loading of extra soil with excavators and transportation to the dumpsite	m ³	225.00
	SUM V.	m	225.00
тотат			
	FOR BILL No. 3.		
BILL No	. 5. BRIDGES		
B-1. BRII	OGE OVER THE RIVER GUBISTSKALI		
	I Preparatory works		
1	Construction of the site, displacing of the delivered gravel soil by bulldozer, leveling	m ³	400.00
2	Construction of technological sites from coarse rocky soil for the construction of abutments, compaction in 0.5m layers	m ³	200.00
3	Excavation of soil by bulldozer for the construction of piers, levelling in situ	m ³	790.00
4	Construction of half-islands from the delivered gravel soil for the construction of piers N5, 6 and N7	m ³	2400.00
5	Gravelling of technological sites of piers by the delivered gravel, leveling by bulldozer	m ²	1010.00
	II. Abtuments N1 and N11		
1	Construction of d-1.2 m reinforced concrete bored piles with the casing pipes, concrete B30F200W6(consider excess of concrete in accordance with soil categories)	l.m	363.00
2	Loading of taken out soil by excavator and disposal to dumpsite	m ³	422.00
3	Removal of damaged concrete on piles heads by jack hammers, loading with excavator and transportation to dumpsite	m ³	16.00
4	Pile integrity test	unit	2

1	2	3	4
5	Construction of reinforced concrete cross-beam, back wall, wings, bedplates and stops against seismicity		
5.1	Excavation of coarse grained soil by excavator, piling in situ, leveling by layers, compaction	m ³	156.00
5.2	Excavation of soil manually	m ³	17.00
5.3	Construction of crushed aggregates bed	m ³	29.00
5.4	Concrete leveling layer B30 F200 W6	m ³	13.00
5.5	Reinforced concrete B30F200W6	m ³	250.00
5.6	Bituminous insulation	m ²	233.00
6	Construction of embankment from coarse rocky soil behind the cones and abutments, compaction in 0.5 m layers	m ³	780.00
7	Construction of cast in situ parapets on wings, concrete B30F200W6	m ³	1.60
	III Piers N2 ÷ N10		
8	Construction of d-1.2 m reinforced concrete bored piles with the casing pipes, concrete B30F200W6(consider excess of concrete in accordance with soil categories)	l.m	2081.00
9	Loading of taken out soil by excavator and disposal to dumpsite	m ³	2563.00
10	Removal of damaged concrete on piles heads by jack hammers, loading with excavator and transportation to dumpsite	m ³	81.00
11	Pile integrity test	unit	72
12	Construction of reinforced concrete raft foundation:		
12.1	Excavation of soil with excavator, pilling in situ	m ³	2211.00
12.2	Excavation of soil manually, strengthening of pit walls	m ³	245.70
12.3	Area of strengthening	m ²	1172.00
12.4	Pumping of water with two pumps, capacity 60 m3/hr	Equip. shift	47.00
12.5	Construction of crushed aggregates bed	m ³	110.00
12.6	Concrete leveling layer B30 F200 W6	m ³	48.00
12.7	Reinforced concrete of raft foundation B30F200W6	m ³	726.00
12.8	Bituminous insulation	m ²	945.00
12.9	Backfilling of soil into the pit	m ³	1573.00
12.10	Loading of extra soil with excavator and transportation to dumpsite	m ³	884.00
13	Construction of reinforced concrete pier column in form work, B30F200W6	m ³	298.00
14	Bituminous insulation	m ²	211.00
15	Construction of reinforced concrete cast in situ cross-beam, supporting bedding and anti- seismic stops, B30F200W6	m ³	342.00
	IV Superstructure		
16	Pre-fabrication of pre-stressed reinforced concrete beams L=33 ∂ and transportation to the site, unloading, B40F200W6	m ³	1808.00
17	Construction of anti-seismic rubber bearing parts on supporting beddings 30x40x9 cm including uniting steel slab	unit	160.00
18	Rubber gasket between beams and stops against seismicity	kg	1760.00
19	Installation of water removing galvanized steel pipes prior to installation of superstructure beams	kg	8857.00
20	Delivery of superstructure beams in trucks and installation by gantry crane type mounting device	unit	80.00
21	Concreting of longitudinal seams of beams and cast in situ areas of end beams, B40 F200 W6	m ³	243.00
22	Connection of the superstructure in one continuous temperature system and construction of back slabs B40F200W6	m ³	72.00
23	Construction of gasket from flexible material for uniting the beams into continuous temperature system	m ²	49.00

1	2	3	4
	V Bridge deck		
24	Construction of cast in situ reinforced concrete slabs on superstructure installed beams h=10.0 cm B40F200W18 (Initial W6)	m ³	463.00
25	In situ concreting of cast in situ reinforced concrete barrier B30F200W6	m ³	130.00
26	Pre-fabrication and installation of embedded details for fixing steel elements of barrier	kg	1980.00
27	Pre-fabrication and painting of steel elements of barriers, transportation and installation	kg	20526.00
28	Installation of cast iron pipes for water removal	unit	60.00
29	Application of bitumen on the surface of cast in situ slab	t	3.80
30	Asphalt concrete of carriageway h=7 cm	m ²	3802.00
31	Cat in situ concrete of sidewalks B40F200W6	m ³	49.50
32	Installation of embedded details for the securing of railing	kg	1056.00
33	Application of bitumen on sidewalk surface	t	0.33
34	Asphalt concrete of sidewalk h=3 cm	m ²	330.00
35	Pre-fabrication of steel railing, painting, transportation and installation	kg	20790.00
36	Painting of reinforced concrete barrier	m ²	660.00
	VI Construction of movement joints		
37	Movement joints (with rubber compensator)	L.m	84.00
	VII Conjunction of bridge with the road bed		
38	Construction of crushed aggregates bedding under transition slabs	m ³	140.00
39	Pre-fabrication of transition slabs, transportation to the site, installation, B30F200W6	m ³	35.80
40	Monolithing of transition slabs B30F200W6	m ³	4.60
41	Protective painting on transition slabs, included leveling layer and protecting layer	m ²	138.00
	IX Construction of reinforced concrete pavement		
42	Construction of base from crushed aggregates h=25 ÷ 45 cm	m ³	90.00
43	Reinforced concrete of pavement B35 F200 W6 h=28 cm	m ²	115.00
TOTAL F	OR B-1.		
B-2. BRI	DGE OVER THE RIVER CHEREKHA		
	I Preparatory works		
1	Construction of the site, displacing of the delivered gravel soil by bulldozer, leveling	m ³	100.00
2	Construction of rip-rap on the right bank in the downstream :		
3	Excavation of soil by excavator, loading and disposal to dumpsite	m ³	135.00
4	Construction of rip-rap from the delivered rocky soil d>0.5m	m ³	305.00
5	Construction of technological site of coarse rocky soil for the construction of abutments , compaction in 0.5 layers	m ³	900.00
	II. Abtuments N1 and N2		
1	Construction of d-1.2 m reinforced concrete bored piles with the casing pipes, concrete B30F200W6(consider excess of concrete in accordance with soil categories)	l.m	478.00
2	Loading of taken out soil by excavator and disposal to dumpsite	m ³	558.00
3	Removal of damaged concrete on piles heads by jack hammers, loading with excavator and transportation to dumpsite	m ³	23.00
4	Pile integrity test	unit	20
5	Construction of reinforced concrete cross-beam, back wall, wings, bedplates and stops against seismicity		
5.1	Excavation of coarse grained soil by excavator, piling in situ, leveling by layers, compaction	m ³	181.00

5.3 Construction of cruched aggregates bed m ³ 3.3.40 5.4 Concrete leveling layer B30 F200 W6 m ³ 14.50 5.5 Reinforced concrete R30F200 W6 m ³ 227.00 5.6 Bitminous insulation m ³ 227.00 5.6 Bitminous insulation m ³ 2264.00 6 Construction of embankment from coarse rocky soil behind the cones and abutments, compaction in 0.5 m layers m ³ 450.00 7 Construction of embankment from coarse rocky soil behind the cones and abutments, compaction in 0.5 m layers on wings, concrete B30F200W6 m ³ 1.60 7 Construction of anti-seismic rubber bearing parts on supporting beddings 30x40x9 cm including uniting steel abb uniti 100 10 Rubber gasket between hearns and stops against seismicity kg 107.00 11 Batter removing advanized steel pipes prior to installation of superstructure hearns in tracks and installation of superstructure on an abut supporting beddings 30x40x9 cm including about a bab B40F200W6 m ³ 24.30 12 Delivery of superstructure hearns in tracks and installation of superstructure hearns in tracks and installation of superstructure hearns	1	2	3	4
5.4 Concrete leveling layer R30 F200 W6 m^3 14.50 5.5 Reinforced concrete B30F200W6 m^3 287.00 5.6 Bituminous insulation m^2 264.00 6 Construction of maintement from coarse rocky soil behind the cones and abutments, compaction in 0.5 m layers m^3 456.00 7 Construction of acti in stin parapets on wings, concrete B30F200W6 m^3 1.60 17 Superstructure m ³ 1.60 18 Superstructure m ³ 1.80.80 9 Construction of pre-stressed reinforced concrete beams L=33 8 and transportation to the site. modoling, B407200W6 m ³ 1.80.80 9 Construction of and-seismic rubber bearing parts on supporting beddlips; 30x40x9 cm init in the site. Modoling, B407200W6 wait 1.80 10 Rubber gasket between beams and stops against seismicity kg 10607.00 hg 11 Installation of vater removing galvanized steel pipes prior to installation of superstructure bas kg 1070.00 12 Delivery of superstructure beams in trucks and installation by gantry crane type mounting unit gata 13 Concreting of ansi tu reinforced concrete slabs on superstructure installed beams m ³	5.2	Excavation of soil manually	m ³	20.00
5.5 Reinforced concrete B30P200W6 m ³ 287.00 5.6 Bituminous instation m ² 264.00 6 Construction of embankment from coarse rocky soil behind the cones and abutments, empaction in 0.5 m layers m ³ 450.00 7 Construction of cast in situ parapets on wings, concrete B30F200W6 m ³ 1.60 7 Construction of cast in situ parapets on wings, concrete Baos 1.=33 g and transportation to the site, unloading, B40F200W6 m ³ 1.80.80 8 Brefabrication of pre-stressed reinforced concrete beams 1.=33 g and transportation to the site, unloading, B40F200W6 m ³ 1.80.80 9 Construction of anti-semis robbe baring parts on supporting beddings 30x40x9 cm lucluding uniting steel slab unit 1.60 10 Rubber gasket between beams and stops agains scismicity kg 1007.00 11 Installation of water removing glavanized steel pipes prior to installation of superstructure beams m ³ 24.30 13 Construction of back slabs B40F200W6 m ³ 24.30 14 Construction of back slabs B40F200W6 m ³ 13.00 15 Construction of back slabs B40F200W6 m ³ 13.00 16 In situ concorcting of cast in situ	5.3	Construction of crushed aggregates bed	m ³	33.30
5.6 Bituminous insulation m² 264.00 6 Construction of embankment from coarse rocky soil behind the cones and abutments, compaction in 0.5 m layers m³ 450.00 7 Construction of cast is situ parapets on wings, concrete B30F200W6 m³ 1.60 <i>IV Superstructure</i> m³ 1.60 8 Pre-fabrication of pre-stressed reinforced concrete basms L=33 8 and transportation to the site, unloading, B40720W6 m³ 1.80.80 9 Construction of anti-seismic rubber bearing parts on supporting beddings 30x40x9 cm including uniting sets islab unit 1.6 10 Rubber gasket between beams and stops against seismicity kg 1.76.00 11 Installation of water removing gubranized steel pipes prior to installation of superstructure beams kg 1007.00 12 Delivery of superstructure beams in trucks and installation by gantry crane type mounting device m³ 24.30 13 Concreting of longitudinal seams of beams and cast in situ areas of end beams, B40 F200 W6 m³ 24.30 14 Construction of cast in situ reinforced concrete slabs on superstructure installed beams h=10.0 cm B40200W18 (Initial W6) m³ 14.200 15 Construction of distallation of embedded details for fixing steel elements of barrier	5.4	Concrete leveling layer B30 F200 W6	m ³	14.50
5.6 Bituminous insulation m² 264.00 6 Construction of embankment from coarse rocky soil behind the cones and abutments, compaction in 0.5 m layers m³ 450.00 7 Construction of cast is situ parapets on wings, concrete B30F200W6 m³ 1.60 <i>IV Superstructure</i> m³ 1.60 8 Pre-fabrication of pre-stressed reinforced concrete basms L=33 8 and transportation to the site, unloading, B40720W6 m³ 1.80.80 9 Construction of anti-seismic rubber bearing parts on supporting beddings 30x40x9 cm including uniting sets islab unit 1.6 10 Rubber gasket between beams and stops against seismicity kg 1.76.00 11 Installation of water removing gubranized steel pipes prior to installation of superstructure beams kg 1007.00 12 Delivery of superstructure beams in trucks and installation by gantry crane type mounting device m³ 24.30 13 Concreting of longitudinal seams of beams and cast in situ areas of end beams, B40 F200 W6 m³ 24.30 14 Construction of cast in situ reinforced concrete slabs on superstructure installed beams h=10.0 cm B40200W18 (Initial W6) m³ 14.200 15 Construction of distallation of embedded details for fixing steel elements of barrier	5.5	Reinforced concrete B30F200W6	m ³	287.00
