

1. Deviation from sizes no more than +3, -1 mm
2. Mass of 1 m concreting is 168 kg, concrete mass per volume 2.3 t/m³
3. Concreting shall be done with hydro technical concrete ГОСТ 26633-91*
4. Main technical requirements for concrete:
 - Solidity class on shrinking - B25
 - Mark on frost resistance - F75
 - Mark on water resistance - W6
 - Density - no less than 2.3 t/m³
 - water cement ratio - no more than 0.5
5. Cement mark no less than 400 ГОСТ 22266-94
6. Small fraction sand filling ГОСТ 8736-93*, thick filling - gravel or road metal ГОСТ 8267-93*
7. Reinforcement with net ГОСТ 23279-85
8. Concrete cracking and bare armature is not allowed

Approved by		T. Javakhishvili			Adigeni - Goderdzi Gas Main Pipeline Construction Project			
Checked by		S. Kirakosovi			DN300 pipe concreting
